

# CIS-DataBridge™ Interface - CIS-DataBridge

---

## Overview

Healthcare organizations focused on improving care coordination must identify technologies that support seamless connectivity to disparate HIT systems. The DSS CIS-DataBridge Interface facilitates the secure exchange of patient data between VistA technology and external clinical information systems (CIS), anesthesia record keepers (ARK) and vital sign monitoring systems.

### Highlights

Anesthesia Record Keeper, ICU & Data Analytics Patient Safety, Efficiency, Accuracy, Reporting  
The CIS-DataBridge Interface is an innovative software solution that enables users to pre-populate anesthesia systems with patient and staff data located in the VistA Surgery Module. It also exports patient and milestone data into VistA for easy viewing and makes it possible to achieve interoperability between VistA and external HIT systems while improving treatment efficiency, accuracy and reporting.

### Key Features

- Enhances care coordination and provider workflows
- Electronically records patient vitals, drugs, fluids and events
- Improves patient outcomes by capturing data from initial admissions to the post-anesthesia care unit (PACU)
- Streamlines data mining, recording and storage of ARK and ICU data
- Accesses current patient data at the point of care in real time
- Seamlessly Records Vitals, Drugs, Fluids, and Events
- Paperless Work Flow; VistA/CPRS & VistA Imaging Integrated
- Captures Data from Admissions to the PACU for Quality Care
- Facilitate Data Mining, Records and Stores ARK & ICU Data.
