

Modernizing VistA - Using Micro Steps to Drive Macro Goals

[Webinar with Certificate](#) | [Recorded Webinar](#) | [Additional Resources](#) | [Others from this presenter](#) | [Related Questions](#)

<p>Modernization as a "technical exercise"</p> 	 <p>Karen Clark</p> <p>Karen Clark PMP, Chief Architect, Government Products has over 25 years of experience in application development and design for hospital information systems in a variety of languages, databases and clinical settings.</p>
--	---

Webinar Overview

This presentation will examine the benefits of adequately leveraging VistA enhancements released through agencies such as VHA and OSEHRA as well as open source add-on modules across VistA platforms. This presentation will also explore why a "micro-level" strategy—modernizing VistA through a hybrid of open source and proprietary solutions, from the ground up, one specialty at a time—can help organizations successfully achieve federally mandated healthcare goals while also improving patient safety.
