

VistA Chemotherapy Manager - VCM

Overview

VCM, is the premier technology for computerizing the administration of chemotherapy for cancer care. It automates the clinical practice of Oncology from the assignment of therapy to the calculation of chemotherapy doses, all the way through to the documentation of care. It is the most widely used product of its type because it combines the most complete range of automation, safety features and flexibility that Oncology practices demand with a highly intuitive user interface making it simple to use. DSS VistA Chemotherapy Manager – VCM is scalable to all clinical settings.
